# Xerox 813 Copier

Desktop convenience.

Copies at your fingertips.

Action-ready on desk or table, the Xerox 813 copier makes crisp, dry, permanent copies on ordinary paper.

**1. Document Feed Slot.** Simply insert original. Copies are produced automatically.

**2. Paper Tray.** Stores and automatically feeds cut sheets of ordinary paper. Buzzer sounds when supply is running low.

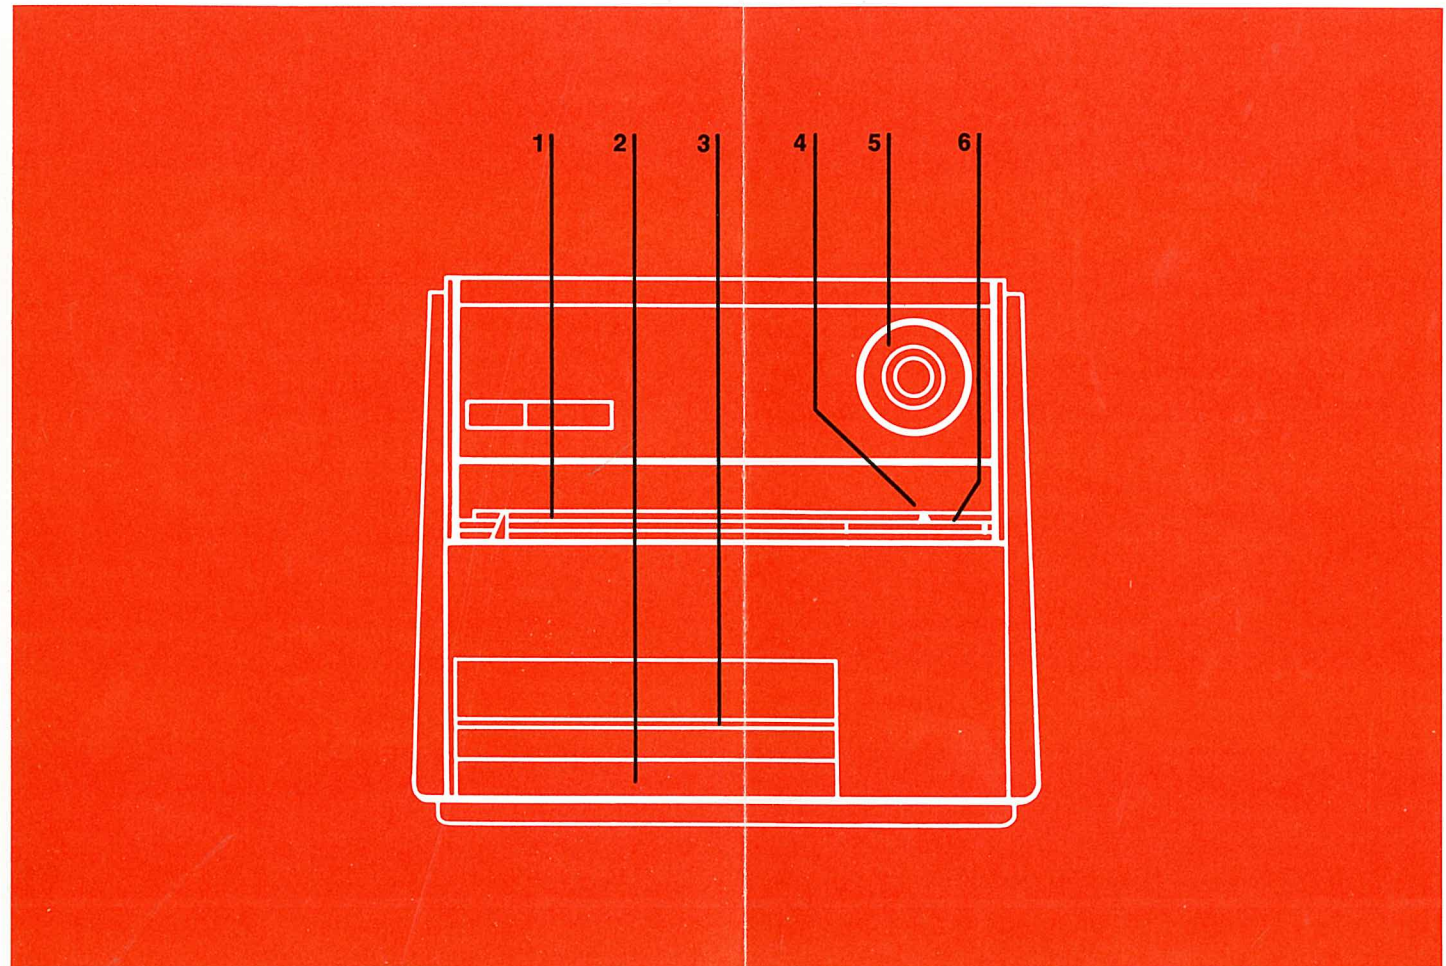

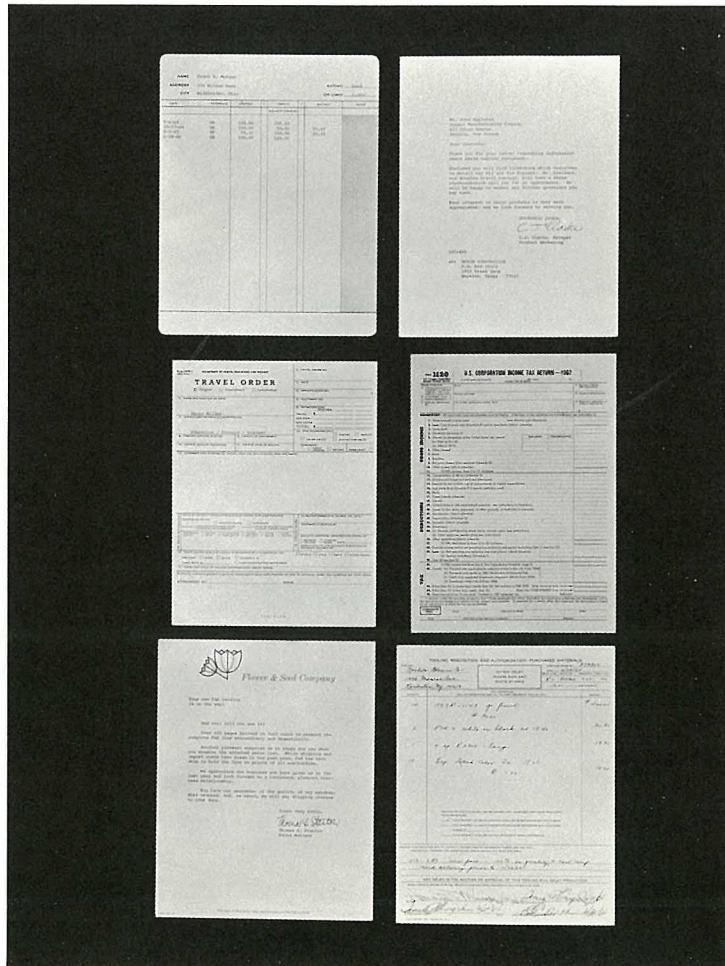

**3. Receiving Tray.** For return of original and copies. When making multiple copies; original will be returned just be-

fore last copy emerges.

**4. ON/OFF Switch.** Readies 813 for all-day use after brief warmup.

**5. Quantity Selector.** Dial for number of copies from each original. Makes 1-10 copies automatically.

**6. REPLACE WEB Light.** High quality copies are ensured by periodic replacement of drum cleaning web.

Directly from your typed, written, printed or drawn original, the 813 faithfully reproduces even the finest details in jet black on white. Makes up to 10 copies at the turn of a dial. The last will be as sharp as the first. The 813 copies colors—ball point pen, pencil, crayon markings—anything that can be put down on paper.

Because the 813 is completely automatic, there are no exposure adjustments to make, no liquids to fuss with, no guesswork, and no waste copies. A Xerox Analyst will describe choice of pricing plans that tailors the 813 exactly to your copying and duplicating requirements.

The ultimate in copying convenience . . . right where the work is.

## **Specifications**

Maximum image area: 8½" x 13".

Copy paper characteristics: Paper weight 20 lb. bond; minimum size 8" x 10"; maximum size 8½" x 14".

Copy speed: First copy delivered in approximately 25 seconds. Additional copies delivered 5 per minute.

Copy characteristics: Copy reduced approximately 6% from original size.

Modes of operation: Single copy (approximately 25 seconds for copy to be delivered). Multi-copy (up to 10 copies at setting of copy dial). 5 copies per minute. Consecutive copy (one copy may be fed into the Copier on top of another, in chain fashion).

## Copier/Duplicators

### Xerox 2400

For the high volume user, the masterless 2400 duplicates 40 copies per minute directly from your original. Automatic sorter can be added to give you completely new duplicating capability right in your own office.

### Xerox 720

The high speed 720 brings new economy in medium-to-high volume duplicating range.

### Xerox 660

Point of need convenience, economy, and simplicity in a desktop copier that returns 660 copies per hour.

### Xerox 330

Using only your original, the 330 makes perfect copies on ordinary bond paper. Similar to the classic 813 with an important difference: modal pricing (based on copy quantity from each original) gives greatest economy in low-to-medium volume duplicating.

## Copiers

### Xerox 914

The leading console copier. Crisp, permanent copies on ordinary bond paper from anything printed, typed, written or drawn . . . even from bound volumes and other three-dimensional objects.

### Xerox 813

From the desktop 813 come copies of 914 quality. Copies on ordinary paper from any single original . . . even legal size. Set dial for copy quantity; no rehandling of original.

## Information Systems

### 2400-IV System

Duplicates computer reports at 40 copies per minute in standard, reduced 11" x 8½" size for easy reading and filing.

### LDX Scanner and Printer

Transmits copies thousands of miles—or intra-plant.

### Xerox Telecopier

Transmits and receives documents by conventional telephone without special connections.

## Engineering Products

### Xerox 1824 Printer

Makes prints up to 18" x 24" from all forms of microfilm.

### Xerox 1860 Printer

Makes same- or reduced-size prints from originals as large as 36" x 120".

### Copyflo II Continuous Printer

Produces prints up to 11" in width from roll microfilm or opaque original documents.

### Copyflo 24C Continuous Printer

Produces prints up to 24" wide from roll or card-mounted microfilm.

### Xerox Standard Equipment

Reduces, enlarges or copies same-size onto wide range of materials including paper and metal offset masters, printed circuit boards and transparencies.
